Aim

To investigate the impact of embedded interactive tools (widgets) in live web-broadcasts on learning.

Context

Inquiry and experiential learning are key pedagogical methods in STEM curricula. As part of the OU’s supported opening learning approach, lab-based broadcasts provide online and distance students an opportunity to observe and engage in practical science demonstrations through synchronous (real-time) methods.

Interaction is crucial to maximise student learning. Empirical data (Martin, Parker & Deale, 2012; Kim, Kim & Han, 2013) suggest that synchronous media:

- Add value to learning through real time discussions
- Provide instantaneous feedback
- Enhance student connectedness, interest and engagement

There remains a gap in the type of pedagogical strategies that promote interactivity in synchronous environments.

Lab-based Broadcasts vs. Online Tutorials

| | Stadium Live Lab-Based Broadcasts | Adobe Connect Online Tutorials |
|------------------------|--|--|
| Number of Students | ~ 10 - > 100 | ~ 5 - 25 |
| Focus | lab-bench experiment field | whiteboard shared screen |
| Interactive Techniques | pre-prepared Q&A widgets, chat box | on-screen activities, polling, raise hand, applaud, chat box, microphone |
| Instructional Strategy | situated presentation | dialogue |
| Motivational Factors | curiosity excitement companionship | support isolation learning |
| Technology | multiple HDI cameras, video mixing desk | restricted camera on device |
| Logistics | production team, presenter and assistant | tutor and assistant |

Approach

| Observations | Surveys | Tests |
|--|--|---|
| <ul style="list-style-type: none">• Teaching practice• Video content analysis | <ul style="list-style-type: none">• Stakeholders attitudes & perceptions | <ul style="list-style-type: none">• Instructional strategies• Pre test/post test |

Draft Research Questions

The study will address the following areas:

- i) Ways collaboration happens between students and presenters.
- ii) Adaptations to encourage equality of knowledge development.
- iii) Perceptions of stakeholders (i.e. students, lecturers and production teams) on live web-broadcasts.

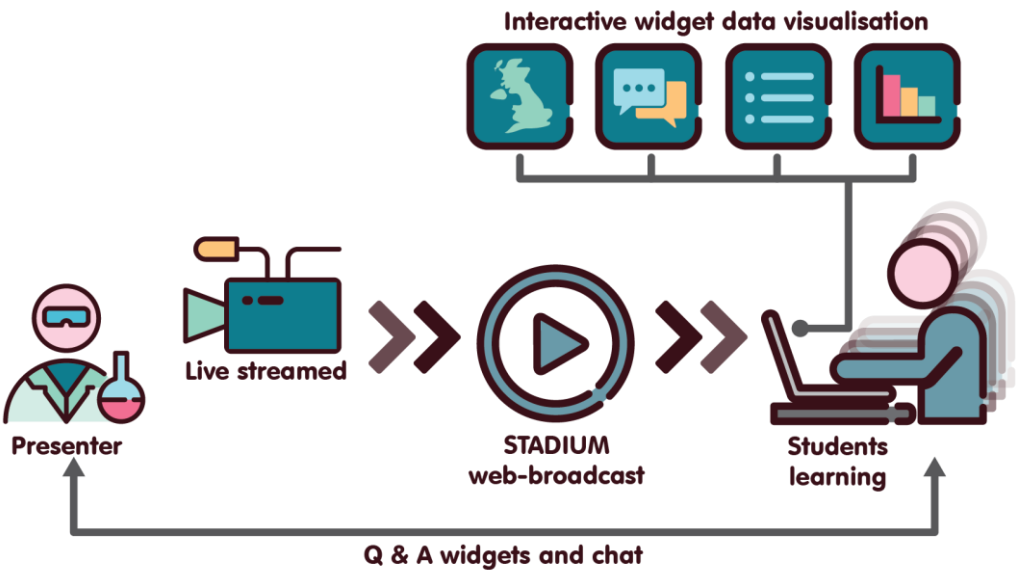

Figure 1. Schemata of live-stream web-broadcast

Areas of Investigation

- Social Presence
- Student Motivation
- Interactivity
- Effectiveness
